Share of Sto Group consolidated turnover for 2023

■ Façade systems ■ Façade coatings ■ Interiors ■ Other product groups

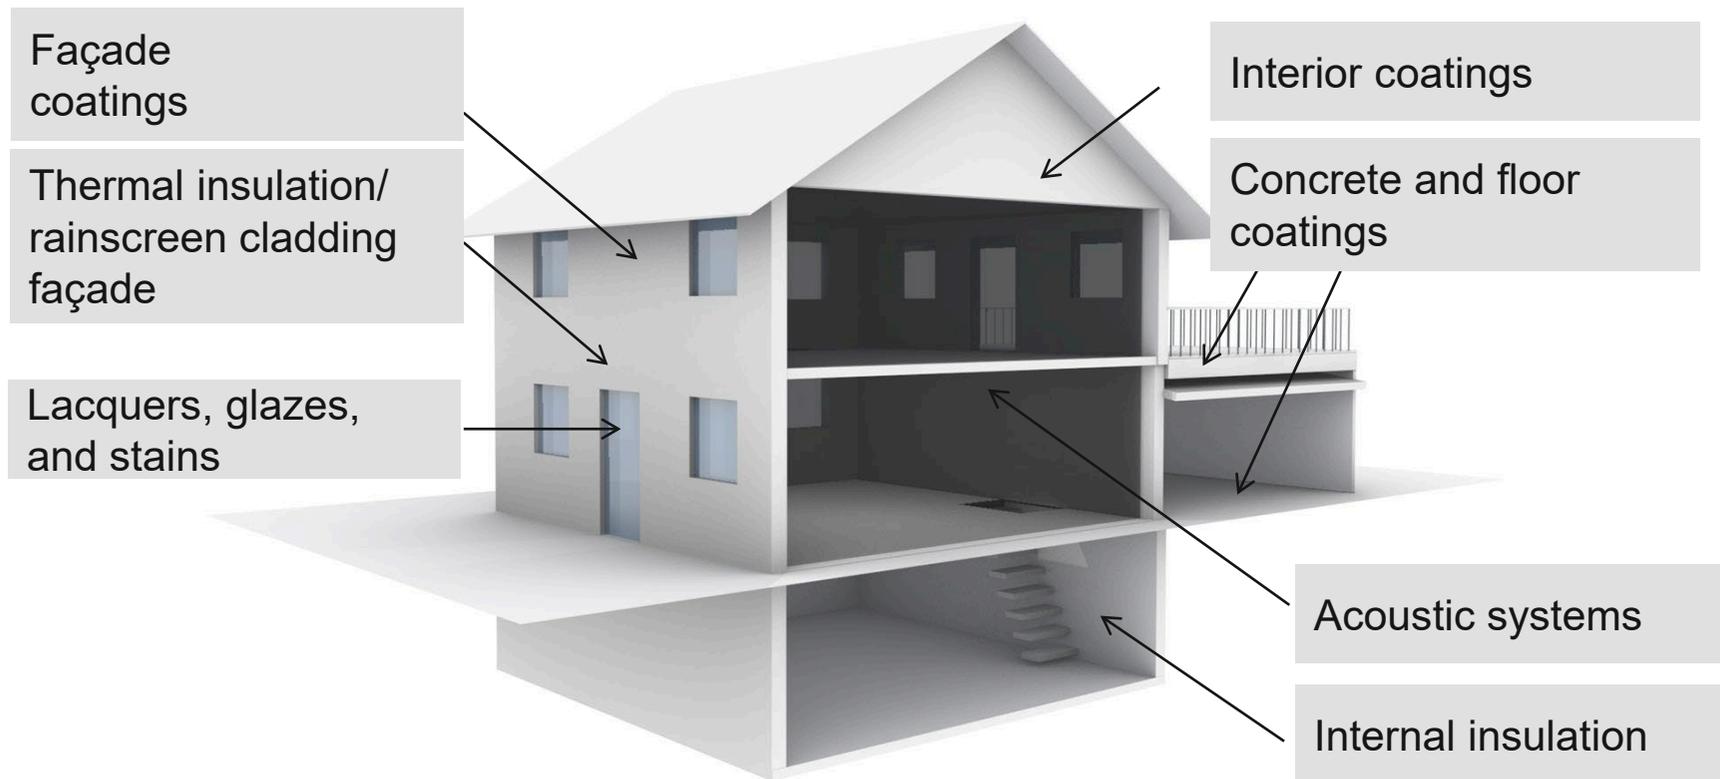

Turnover 2023
Sto Group:
EUR 1,718 million

Figures in EUR million and %; other product groups: Including floor coatings and products for concrete repair.

Applications

Sto products & systems

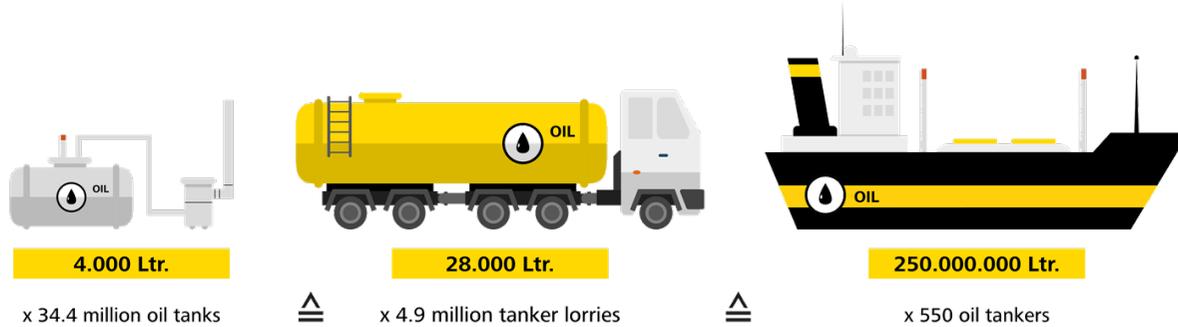

Simplified schematic diagram.

Sto's business model makes a direct contribution

Thermal insulation helps to protect the environment

The energy savings from the use of Sto facade insulation systems since 1965 correspond to a total of around 137.5 billion liters of heating oil

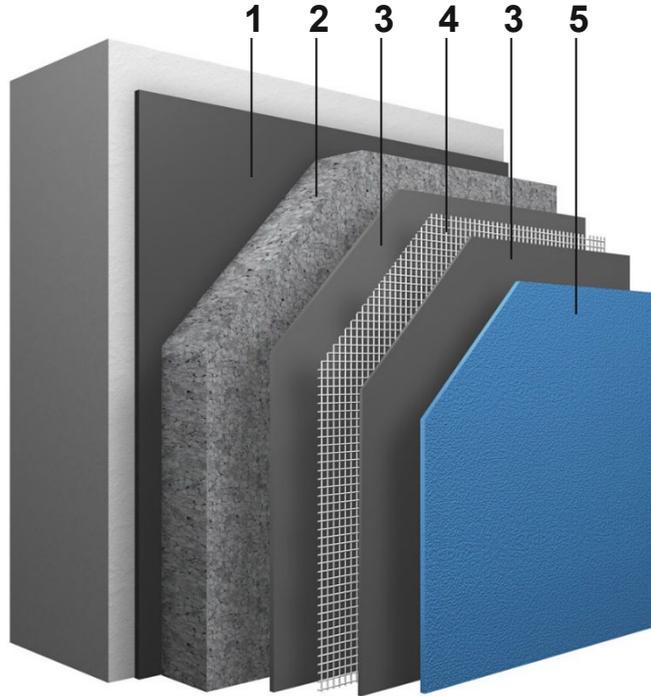

Between 1965 and 2023, facade insulation systems from Sto played a direct role in saving precious energy in the construction sector. Extrapolation of this amounts to a saving of up to 137.5 billion litres of heating oil. With this, Sto has made a notable contribution to global climate protection: to put it another way, around 440 million tonnes of CO₂ were not even released into the atmosphere in the first place thanks to our facade insulation systems. In 2023 alone, Sto products reduced emissions of this combustion gas by a potential 24 million tonnes.

Climate protection

Sto products - external wall insulation system (EWIS)

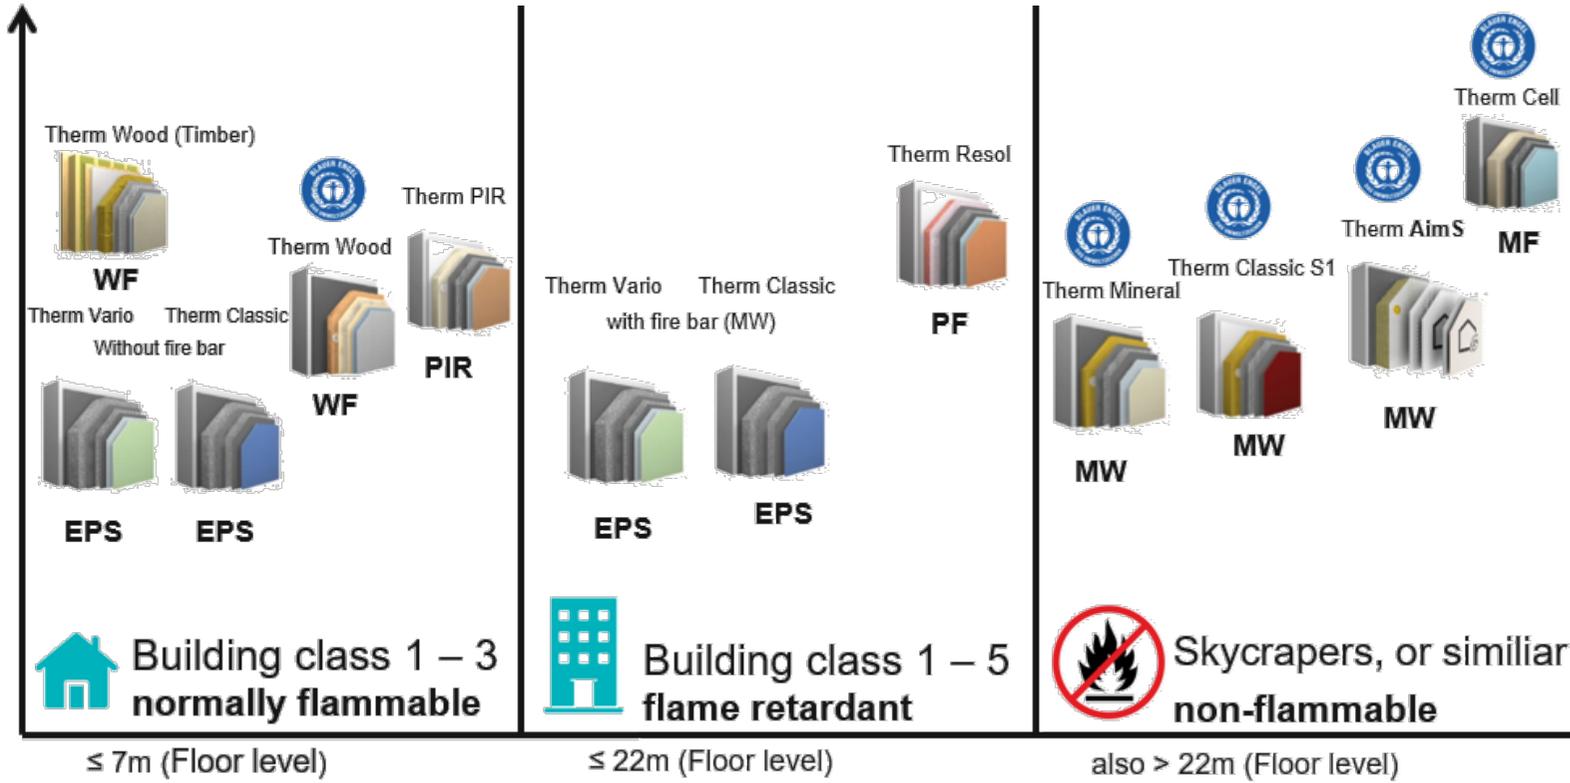

StoTherm Classic®system build-up

- 1 – Bonding
- 2 – Insulation
- 3 – Reinforcing compound
- 4 – Reinforcing mesh
- 5 – Finish

ETICS according to fire class and costs (investor)

Costs relatively Sto is an insulation-indifferentiated system provider for ETICS.

Abbreviations:
 EPS = Expanded Polystyrene
 WF = Wood Fiber
 PIR = Polyisocyanurate
 PF = Phenolic Foam
 MW = Mineral Wool
 AimS = Aim Sustainability, i.e. particularly sustainable
 MF = Mineral Foam
 = Blauer Engel Cert.

To the building classes please observe the valid state building relations

Insulation thickness depending on requirements, here $U = 0,20 \text{ W}/(\text{m}^2\text{K})$

Notes: Presentation exclusively relevant for the German market. Costs include material + labour.

Sto Color PuraClean. Beautiful. Stable. Clean.

- **Matt appearance**
Compared to conventional washable interior paints
- **Healthy ambient interior climate**
The washable wall paint is free from plasticisers and isocyanates
- **Resistant to disinfectants and dirt**
Thanks to special surface properties
- **Non-combustible**
Provides additional safety and enables application in all environments
- **High whiteness**
Ensures bright and friendly rooms with pleasant light reflection
- **Even flow properties**
The smooth consistency allows the paint to be applied easily and evenly

- **Quality, climate protection and resource conservation** are the basis for our **AimS product line**.
We are setting **new standards** in ecological and economic criteria **and** achieving **excellent processing properties**.
 - **Approx. 30% of the binder in AimS plasters and paints** is made from **renewable raw materials**. **Pine oil** is used instead of crude oil.
 - For a **detached house with a facade area of approx. 200 m²**, the use of StoArmat Classic AimS / Stolit AimS / StoColor Lotusan AimS **saves approx. 40 litres of crude oil**.
- Conclusion: **The more buildings that are coated with AimS products, the better it is for climate protection.**

Expertise in industrially prefabricated façade panels

"SkyRise Prefab provides a modern alternative to traditional building construction methods of the past. And thus addresses the key challenges in the construction industry...."

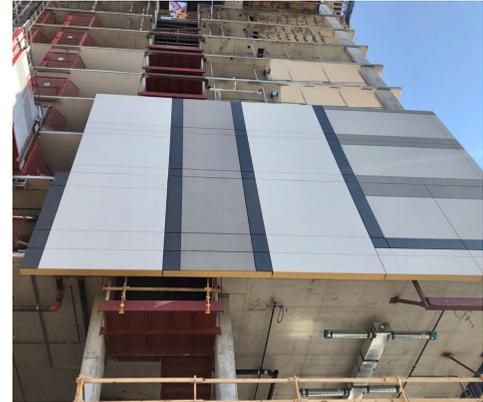

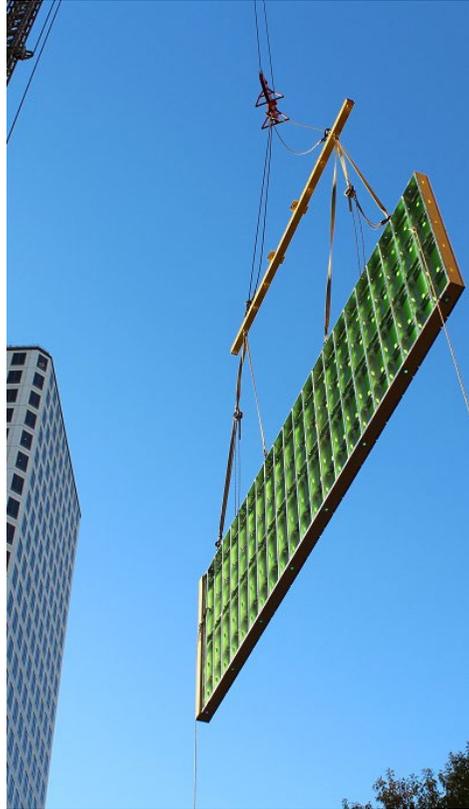

- Skills shortage
- Construction costs (scaffolding, waste, fundament etc.)
- On-time delivery
- Weather independence
- Increase in quality / damage prevention
- Delays in the construction process (planning, production, installation)

Project: The Hub on Campus
Architect: Antunovich Associates
General Contractor: Shiel Sexton

Everybody is talking about CSR – Corporate Social Responsibility. But actions speak louder than words. Sto is fulfilling its social responsibility in three concrete areas.

Thermal insulation equals climate protection:our products.

Sto has been selling facade insulation systems for over 50 years and supplied insulation for around **730 million m²** of facade surfaces from 1965 to 2023.

This equates to a saving of **440 million tonnes** of carbon dioxide for the Earth's atmosphere.

TRAINING AND FURTHER EDUCATION FOR TRADESPEOPLE AND ARCHITECTS

Promoting young talent through education: the StoFoundation

The foundation, which was launched in 2005, promotes the education of young people in trade and academic environments. It also supports projects for the preservation of historic monuments and the development of eco-friendly building materials.

Global megatrends - Significant opportunities for Sto

Climate change + ecosystem threats	Technology + innovation	Demographic change	Future markets/ Globalisation trends	Sustainability + global responsibility	Scarcity of resources	Global knowledge societies
Global warming	Innovation enables efficiency	Global population increase and migration	Advancing globalisation	Good governance of countries	Growing energy consumption	Knowledge society
Increasing CO ₂ emissions	Progress in biosciences	Company Ageing society	Increasing economic integration	Philanthropy and NGOs	Demand for water and food	Need for experts
Global ecosystems in danger	Digital transformation	Trend towards urbanization	Emerging countries catching up with industrial nations	Companies as corporate citizens	Regional imbalances regarding raw materials	Tackling gender inequality

Opportunities

Example:

- The **EU Energy Performance of Buildings Directive** was adopted by the Council of the European Union
- The transposition into **national law** in conjunction with the goal of a **climate-neutral building stock by 2045** will lead to an **increase in refurbishment activities**

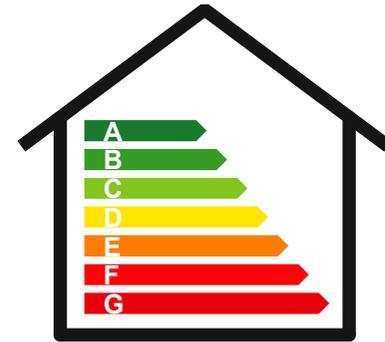

Challenges

Example:

In the ongoing discussions on the **EU chemicals strategy**, the **economic** and **technical/content-related effects** on our products must be continuously reviewed with regard to **future regulations** and adjustments made if necessary.

Status of the EU Energy Performance of Buildings Directive

- **EU agreement** on a standardised Energy Performance of Buildings Directive (EPBD) in **April 2024**. Implementation phase into **national law** runs until mid-2026.
- However, the EU was unable to agree on **mandatory minimum standards (Minimum Efficiency Performance Standard, MEPS for short)** for **residential buildings**. These have been introduced for **non-residential buildings**.
- **Residential building:**
 - **Reduction in primary energy demand by 2030** (by 16 % or 20-22 % by 2035 compared to 2020).
 - **Reduction of up to 55 % must** come from the so-called "**worst-performing buildings**".
- **Non-residential buildings:**
 - **Obligation to refurbish** the **16 %** with **the poorest** energy performance by **2030**; **26 %** with **the poorest** energy performance by **2035**.
- In the area of **residential buildings**, the majority of savings must come from the **buildings with the poorest energy performance** – from a technical point of view, this effect cannot be achieved simply by changing the plant technology and **therefore requires improvements to the building envelope**.

Building stock in Germany

- **Sto** has extensive **expertise** when it comes to **energy-efficient facade insulation** for **new buildings and refurbishment projects**
- Although new building projects have stagnated at the moment, there is **immense demand** for **extra new living space**
- At the same time, there was and is **a high need for refurbishment of existing buildings**
- **Legislators** are called upon to set the framework for sustainable investments in the building sector
 - Do not increase technical requirements any further
 - Reduce bureaucracy
 - Targeted funding

The landscape of subsidy schemes in Europe (1/2)

 **ECO 4 – € 4.7 billion** (£ 4 billion) with 3.5 million homes eligible.
SHDF wave 2.1 – € 923 million (£ 778 million) for social housing supplemented through wave 2.2 – **€ 95 million** (£ 80 million) till 2025 and wave 3 – **€ 1.4 billion** (£1.2 billion) till 2028.

 **€ 1.13 billion**, 6 years (2023-2028) Home renovation initiative with mandatory renovations. Based on the subsidy programs **renolution.brussels, energie wallonie, MY VerbouwPremie**.

 **BEG subsidy of € 13 billion** for energy-efficient refurbishment measures. Increased depreciation for investors of 5% p.a. over 6 years through the **Growth Opportunities Act**.

 **MaPrimeRénov'** – **€ 3 billion** in funding for 2024 (reduction of € 2 billion compared to 2023).

 **Royal Decree 853/2021 Rehabilitacion** – **€ 27.4 billion** budget
PIREP local – public buildings with a budget of **€ 600 Mio**.

Strategy

Overview of the strategy's target dimensions

Customer focus

We are a reliable and flexible partner, and stand for expert advice, functional products, and tangible sustainability

Performance potential

We harness and promote potential in relation to market reach, solutions leadership, and operational excellence

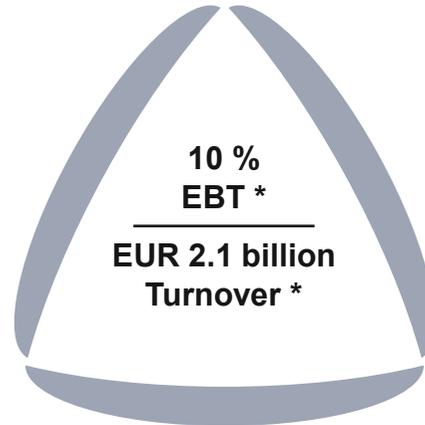

Dedicated employees

We train and develop our employees, enabling us to lay the foundations for sustainable corporate success

Medium-term targets and profit initiatives

Growth initiatives

1. Core segment of external wall insulation systems
2. Two-tier distribution
3. Market potential besides EWIS
4. Prefabricated renovation systems
5. Efficiency-enhancing – digitally supported – complete solutions
6. New sales channels, customer groups, and markets
7. New Business

Core expertise initiatives

8. Research and technology activities
9. Sustainability as a core area of expertise

Profit initiatives

10. Centrally managed supply chain
11. Efficient process organisation
12. Reduced complexity
13. Regionalisation and shared services
14. Focus on loss-making companies

* The previous target for 2025 as well as the medium-term target 2027 were cancelled in the ad hoc announcement dated 24 July 2024. An updated and specified forecast shall be announced with finalization of the Guidance 2025, latest in April 2025.

Strategy

Sustainability gaining importance - at a global level

Sto is aware of its responsibility to contribute to the fulfilment of the **17 Sustainable Development Goals (SDGs)** of the United Nations and to respond to key trends: increased customer and stakeholder requirements, demand for “sustainable products”, green building systems, EU Green Deal, national legislation, funding initiatives, etc.

compared to 2023

Sto Group financial figures 01 – 03 2024

Summary

- ✓ Consolidated turnover down by 5.9 % in the first quarter of 2024 compared to the same period of the previous year.
- ✓ Demand in Germany and outside of Germany curbed due to weather conditions and reluctance to invest in the building industry.
- ✓ Increase in seasonally typical Q1 deficit compared to 2023.
- ✓ Year-on-year, slight increase in number of Sto Group employees to 5,804 worldwide.
- ✓ Outlook for 2024 as a whole unchanged: turnover of EUR 1.79 billion and EBIT of between EUR 113 million and EUR 138 million expected in the Group.

Sto Group 2023

Forecasted turnover and earnings targets achieved

About the title image

The library building of the Karl Franzens University of Graz was extended in several construction stages. A two-storey, modern structure, which towers over the forecourt in a sweeping gesture, complements the historic ensemble of buildings. The architectural firm Atelier Thomas Pucher designed its highly energy-efficient envelope with a rainscreen cladding façade (StoVentec) with modelled render surfaces (StoMiral MP) and glass panels (StoVentec Glass). The underside of the cantilever was designed by Viennese artist Anna Artake with a sgraffito showing an enlarged copperplate engraving of a 17th century book illustration. Sto Group financial figures 2023

Summary

- ✓ The Sto Group achieves forecast turnover and earnings targets for 2023 in a difficult market environment.
- ✓ Decline in consolidated turnover of 3.9 % to EUR 1,718.0 million primarily due to negative weather conditions and increasing uncertainty among investors.
- ✓ Gross profit margin improves from 50.7 % to 53.9 %.
- ✓ Group EBIT decreases by 2.5 % to EUR 126.5 million and EBT by 0.7 % to EUR 127.4 million.
- ✓ Increase in EBT return on sales from 7.2 % to 7.4 %.
- ✓ Cash flow from operating activities amounts to EUR 170.9 million (previous year: EUR 95.3 million).
- ✓ Group workforce increases slightly by 48 to 5,783 employees as at the reference date.
- ✓ Outlook for 2024: Sto expects a Group turnover of EUR 1.79 billion and EBIT of between EUR 113 million and EUR 138 million.

Significant opportunities and risks

Significant opportunities

- ✓ Sto products and systems improve the energy efficiency of buildings and thus contribute to climate protection
- ✓ Green Deal
- ✓ Reformation of European Energy Performance of Buildings Directive (EPBD)
- ✓ Government support programmes
- ✓ Need for energy-efficient refurbishment of buildings
- ✓ Sto products increase the value retention of buildings
- ✓ Lack of living space
- ✓ Economic cycle

Significant risks

Risk area	Risk class	Development
Sales risks, overall economic and industry-specific risks	1	→
Dependence on weather conditions	1	→
Risks in procuring raw materials, bought-in products, and energy	2	↓
Geopolitical and country-specific risks	2	→
IT risks	2	→
Warranty-related and legal risks	2	→
Financial risks	2	→
Human resources risks	3	→
Risks concerning processes and added value	3	→
Climate and environmental risks	3	→
Tax-related risks	3	→

Outlook

Outlook for 2024 as a whole

	2024*
Turnover	approx. EUR 1.60 billion
EBIT	EUR 50 - 68 million
EBT	EUR 52 - 70 million
Return on Sales (EBT)	3.2 - 4.4 %
ROCE	6.6 - 9.1 %

* In each case without factoring in the impact of an escalation of the Russia-Ukraine and Middle East conflicts.

It must be pointed out that the weather conditions, which are important for the Sto Group's business development, may have a significant impact on the development of turnover and earnings in the 2024 fiscal year. The risks and opportunities for 2024 fiscal year are described in detail in the Management report of the Annual Report 2023.
